IIT Bhubaneswar establishes AI and HPC Research Center (AHRC) for interdisciplinary and collaborative research. AHRC aims to find solutions to real world problems in medicine, agriculture, environment, sustainable communities, smart cities, and cyber security. The center will provide a global platform for cutting-edge research and innovation in AI and HPC. It will collaborate with national and international institutions, including AIIMS and other IITs. The center is developing AI tools for diagnosis and screening of diseases in rural communities.

BHUBANESHWAR: To conduct interdisciplinary and collaborative research in the fields of artificial intelligence (AI) and high performance computing (HPC), the IIT Bhubaneswar has established a new AI and HPC Research Center (AHRC) in its campus.

The institution has designed it as a national research center with participation of other noted academic, industry and government research firms in the country and abroad to find solutions to real world problems in different areas through research, innovation and application of AI and HPC, said the official sources.

"The most pressing research and innovation focus of AHRC is in the application of AI and HPC in areas that directly benefit the society such as medicine, agriculture, environment, sustainable communities, smart cities and cyber security," said the official statement issued by IIT Bhubaneswar on Wednesday.

IIT Bhubaneswar director Shreepad Karmalkar, who will serve as the chairman of the AHRC Board, said the institute is hosting this one-of-its-kind national research center to provide a global platform to the researchers from the state and across India for conducting cutting-edge research and innovation in the field of AI and HPC, which is the need of the hour.

AHRC director Ashwini Nanda said the objective of the centre is to bring global knowhow to serve the people of India, as well as make global technology impact and serve the global community through its world class research.

Subhranshu Ranjan Samantaray, associate center-director of AHRC, said the institute has started this centre with its own resources. It will soon submit big project proposals before the government and corporate houses to raise funds for continuing research works, he added.

"We have started this centre keeping the advanced laboratory on AI in the USA. We will make it a model centre for others in the country," said Samantaray.

Apart from international collaborations, the AHRC is collaborating with national institutions like AIIMS and other IITs, along with universities in Odisha and the Odisha government. The scientists of the centre are working on developing AI tools for diagnosis of several diseases and fast screening for life threatening diseases in the rural communities in Odisha in collaboration with scientists from AIIMS Bhubaneswar and State University of New York in the United States, said the official sources.

IIT Bhubaneswar Launches AI and HPC Research Center for Cutting-Edge Solutions

IIT Bhubaneswar inaugurated the AI and HPC Research Center (AHRC) to spearhead interdisciplinary research in artificial intelligence (AI) and high-performance computing (HPC). Positioned as a national research hub, AHRC aims to address societal challenges through AI and HPC applications in fields such as medicine, agriculture, and cybersecurity. Led by IIT Bhubaneswar, the centre collaborates globally and domestically to foster cutting-edge research, exemplifying a commitment to innovation, technology impact, and service to both local and global communities.

IIT-Bhubaneswar sets up new centre for AI research

AHRC scientists are working on developing AI tools for diagnosis of several diseases.

By Express News Service

BHUBANESWAR: The Indian Institute of Technology (IIT-Bhubaneswar) has established a new AI and HPC Research Centre (AHRC) to conduct interdisciplinary and collaborative research in the fields of AI and high-performance computing (HPC).

While the director of IIT-Bhubaneswar Prof Shreepad Karmalkar will serve as the chairman of the AHRD board, Prof Ashwini Kumar Nanda of the institute will lead AHRC activities as its founding center-director.

“This one-of-a-kind national research centre hosted by IIT-Bhubaneswar will provide a global platform to the researchers from the state and across India for leading-edge research and innovation in the field of artificial intelligence and high-performing computing, which is the need of the hour,” said Prof Shreepad.

At the centre, researchers from various fields of engineering, computer science, medicine, agriculture, basic sciences, finance, economics and other areas will work together to find integrated and comprehensive solutions to problems faced by industry and society.

In addition to establishing research collaborations with over a dozen US universities and industrial laboratories, AHRC will also collaborate with national institutions such as AIIMS and other IITs, as well as universities in Odisha and the state government. AHRC scientists are working on developing AI tools for the diagnosis of several diseases.

SUBHASHISH MOHANTY

Bhubaneswar: The Indian Institute of Technology (IIT) Bhubaneswar has established a new AI and HPC Research Center (AHRC) to conduct interdisciplinary and collaborative research in the field of AI and High Performance Computing (HPC).

The centre started working on developing AI tools for the diagnosis of several diseases.

AHRC is designed as a National Research Center with the participation of other eminent academic, industry, and government research organisations in India and abroad to find solutions to real-world problems in several areas through research, innovation and application of Artificial Intelligence and High-Performance Computing.

Director, IIT Bhubaneswar, who serves as the chairman of the AHRC Board, Prof. Shreepad Karmalkar said: "This one-of-a-kind national research centre hosted by IIT Bhubaneswar will provide

a global platform to the researchers from the state and across India for leading-edge research and innovation in the field of Artificial Intelligence and high performing computing, which is the need of the hour."

Karmalkar said: "AHRC scientists are working on developing AI tools for diagnosis of several diseases and fast screening for life-threatening diseases in the rural communities in Odisha in collaboration with scientists from AIIMS

(All India Institute of Medical Sciences) Bhubaneswar and State University of New York in the United States."

Prof Ashwini Kumar Nanda, who leads AHRC activities as its founding centre director, said: "The goal of AHRC is to bring global knowhow to serve the people of India, as well as make global technology impact and serve the global community through its world-class research."

AHRC will promote a collaborative environment where scientists and academicians from multiple disciplines and multiple institutions will come together to form a common resource pool and knowledge pool to cope with this fast-moving field.

"Researchers from various fields of engineering, computer science, medicine, agriculture, basic sciences, finance, economics and other areas will work together to find integrated and comprehensive solutions to problems faced by industry and society," said an official of IIT.

Artificial Intelligence & High Performance Computing Centre Established At IIT Bhubaneswar

Bhubaneswar: The Indian Institute of Technology (IIT) Bhubaneswar has set up an AI and HPC Research Centre (AHRC) to conduct interdisciplinary and collaborative research in the fields of artificial intelligence (AI) and high performance computing (HPC).

Designed as a National Research Centre, AHRC will involve participation of other eminent academic, industry and government research organisations in India and abroad in an effort to find solutions to real world problems in several areas through research, innovation and application of artificial intelligence and high performance computing.

Scientists and academicians from multiple disciplines across institutions will come together to form a common resource pool and knowledge pool to cope with this fast-moving field.

Researchers from different fields of engineering, computer science, medicine, agriculture, basic sciences, finance, economics and other areas will work together to find integrated and comprehensive solutions to problems faced by industry and society.

The most pressing research and innovation focus of AHRC is in the application of artificial intelligence and high performance computing in areas that directly benefit society such as medicine, agriculture, environment, sustainable communities, smart cities and cyber security.

IIT Bhubaneswar Director Prof. Shreepad Karmalkar will serve as the Chairman of AHRC Board and Prof. Ashwini Kumar Nanda will lead AHRC activities as its founding Centre-Director.

Prof. Subhranshu Ranjan Samantaray and Professor Manoranjan Satpathy will be Associate Centre-Directors of AHRC.

आइआइटी भुवनेश्वर ने की एआइ और हाई परफॉर्मिंग कंप्यूटिंग अनुसंधान केंद्र की स्थापना

आजाद सिपाही संवाददाता

भुवनेश्वर। भारतीय प्रौद्योगिकी संस्थान (आइआइटी) भुवनेश्वर ने एआइ और हाई परफॉर्मिंग कंप्यूटिंग (एचपीसी) के क्षेत्र में अंतःविषयक और सहयोगी अनुसंधान करने के लिए एक नवीन एआइ और एचपीसी अनुसंधान केंद्र (एचआरसी) की स्थापना की है। एचआरसी को आर्टिफिशियल इंटेलिजेंस और हाई परफॉर्मिंग कंप्यूटिंग के अनुसंधान, नवाचार और अनुप्रयोग के माध्यम से कई क्षेत्रों में वास्तविक दुनिया की समस्याओं का समाधान खोजने के लिए भारत और विदेशों के सहित अन्य प्रतिष्ठित अकादमिक, उद्योग और सरकारी अनुसंधान संगठनों की भागीदारी के साथ एक राष्ट्रीय अनुसंधान केंद्र के रूप में डिजाइन किया गया है। एचआरसी एक सहयोगी वातावरण को बढ़ावा देगा जहां कई विषयों और कई संस्थानों के वैज्ञानिक और शिक्षाविद तेजी से आगे बढ़ने वाले क्षेत्र से निपटने के लिए एक सामान्य संसाधन पूल और ज्ञान पूल बनाने के लिए एक साथ कार्य कर सकेंगे। इंजीनियरिंग, कंप्यूटर विज्ञान, चिकित्सा, कृषि, आधारीय विज्ञान, वित्त, अर्थशास्त्र और अन्य क्षेत्रों के विभिन्न शोधकर्ता, उद्योग और समाज के सामने आने वाली समस्याओं के एकीकृत और व्यापक समाधान खोजने हेतु एकजुट होकर कार्य करेंगे। एचआरसी का सबसे महत्वपूर्ण अनुसंधान और नवाचार फोकस उन क्षेत्रों में आर्टिफिशियल इंटेलिजेंस और हाई परफॉर्मिंग कंप्यूटिंग के अनुप्रयोग में है जो प्रत्यक्ष रूप से समाज को लाभान्वित

करते हैं जैसे कि चिकित्सा, कृषि, पर्यावरण, स्थायी समुदायों, स्मार्ट शहरों और साइबर सुरक्षा। प्रो श्रीपाद करमलकर, निदेशक, आइआइटी भुवनेश्वर एचआरसी बोर्ड के अध्यक्ष के रूप में कार्य करेंगे, और प्रो अश्विनी कुमार नंदा एचआरसी गतिविधियों को इसके संस्थापक केंद्र-निदेशक के रूप में नेतृत्व करेंगे। इसके अलावा, प्रो सुब्रंशु रंजन सामंतराय और प्रोफेसर मनोरंजन सत्पथी एचआरसी के सहयोगी केंद्र-निदेशक के रूप में कार्य करेंगे। आइआइटी भुवनेश्वर की इस महत्वपूर्ण पहल के संबंध में, प्रो श्रीपाद करमलकर ने कहा कि : आइआइटी भुवनेश्वर द्वारा निर्मित यह एक तरह का राष्ट्रीय अनुसंधान केंद्र है जो समय के मांग के अनुरूप राज्य और पूरे भारत के शोधकर्ताओं को आर्टिफिशियल इंटेलिजेंस और हाई परफॉर्मिंग कंप्यूटिंग के क्षेत्र में अग्रणी अनुसंधान और नवाचार के लिए एक वैश्विक मंच प्रदान करेगा। केंद्र-निदेशक प्रो अश्विनी नंदा के

शब्दों में कहा जाए तो, एचआरसी का लक्ष्य भारत के लोगों की सेवा करने हेतु वैश्विक जानकारी लाने के साथ-साथ वैश्विक प्रौद्योगिकी प्रभाव बनाने और अपने विश्व स्तरीय अनुसंधान के माध्यम से वैश्विक समुदाय की सेवा करना है। एक दर्जन से अधिक अमेरिकी विश्वविद्यालयों और औद्योगिक प्रयोगशालाओं के साथ अनुसंधान सहयोग स्थापित करने के अलावा, एचआरसी राष्ट्रीय संस्थानों जैसे एम्स और अन्य आइआइटी के साथ-साथ ओडिशा और ओडिशा राज्य सरकार के विश्वविद्यालयों के साथ मिलकर सहयोग कर रहा है। उदाहरण के लिए, एचआरसी के वैज्ञानिक एम्स भुवनेश्वर और संयुक्त राज्य अमेरिका में स्टेट यूनिवर्सिटी ऑफ न्यूयॉर्क के वैज्ञानिकों के सहयोग से ओडिशा के ग्रामीण समुदायों में कई बीमारियों के निदान और उनमें होने वाली जानलेवा बीमारियों की तेजी से जांच के लिए एआइ उपकरण विकसित करने पर काम कर रहे हैं।
